Your personal selection

Our offered emerald selection is described as natural, sourced from Muzo, Boyaca, with individual reports from the Instituto Colombiano de Gemologia (ICG). We review the actual gem, its known treatments and available report before confirmation. A report does not automatically identify a specific mine.

Materials and guide prices

Choose 18K gold or Italian 950 silver. Gold-option guide prices appear in COP with approximate USD equivalents; silver is quoted separately. Gemstone, dimensions, construction, accents, fabrication, applicable taxes and delivery are confirmed in your written quote.

USD conversion: COP 3,194.44 per USD 1. Reference date: 13 October 2026. This is not a live rate or guaranteed payment amount. Final currency, total and conversion fees are confirmed in your quote. Exchange-rate source: Wilkinsonpc.

Earrings are priced per pair. Pendant chains are confirmed separately. Bracelet bead, charm and centre prices are components, not complete bracelets. Weight preferences are planning inputs, not measured weights.

References illustrate designs, shapes or components for discussion, not live stock or evidence of gem identity, metal purity or a laboratory report. Review the actual stone and final proposal before ordering.
